Death of a Child Policy

The unexpected death of a child at a Service is a traumatic event and the impact on Educators, children and families can cause emotional turmoil, which can overwhelm usual coping skills. A policy providing comprehensive procedures and principles is therefore crucial to ensure a coordinated response and notification to the regulatory authorities.

Due to the suddenness of such an event, well-trained and experienced staff can experience strong emotions and traumatic stress responses as a result of the event. The role of our Service is to help restore a sense of safety for children, Educators and families as soon as possible following a traumatic event.
