JANUARY
2026

ON *this* MONTH

AT TRIKKI KIDZ

All Services Opening Day for 2026 ----- 05
First day of Preschool for 2026 (Barooga) -----27
First day of Kinder for 2026 (Yarrawonga & Cobram) ----27

AROUND THE COUNTRY

Kid Inventors Day ----- 17
Australia Day -----26
International Lego Day ----- 28

SERVICE CLOSURE DAY

Australia Day Public Holiday -----26

HAPPY *New Year*

Management would like to welcome back existing families and warmly welcome all new families for 2026. Please be informed of some differences in the operations of our three services during January.

Barooga and Yarrawonga children will move to their new rooms from Monday 5th January. However, Cobram children will remain in their existing rooms until the first day of term 1, Tuesday 27th January, following the Australia Day Public Holiday. This coincides with the start of the kindergarten program. If you have any concerns, please speak to your child's Lead Educator or a member of our management team.

AUSTRALIA DAY – JANUARY 26

Australia Day is a day to reflect, respect and celebrate the Australian spirit and the best of this country – our mateship, our sense of community and our resilience. We find optimism and hope as we look to the future.

Reflect. Respect. Celebrate. We **reflect** on our nation's past, which began more than 65,000 years ago, and the impact of European settlement on the First Nations Australians. Our national day is a time, above all, for inclusion and respect. **Find out more about Australia Day here.**

KID INVENTORS' DAY – JANUARY 17

The television, water skis, earmuffs and the popsicle all have something in common. Do you know what it is? All were invented by kids! 500,000 children and teens invent gadgets and games each year. Celebrate the ingenuity and value of young brainstormers on KID INVENTORS' DAY! **Find out more here.**

EASY ONE BOWL SAVOURY MUFFINS

PREP 12 mins | COOK 18 mins | SERVES 12

INGREDIENTS

- 2 cups **plain wholemeal flour**
- 2 teaspoons **baking powder**
- sea salt and pepper**, to season
- 60 grams **butter**
- 1/2 cup (125 ml) **milk**
- 3 **eggs**
- 1 medium **zucchini**, grated
- 1 medium **carrot**, grated
- 1 cup (160 grams) **canned corn kernels**, drained
- 1 1/3 cups (150 grams) **tasty cheese**, grated

METHOD

1. **Preheat** oven to 180 C and line a 12-hole muffin tin with papers. **Set aside.**
2. **Place the flour**, baking powder, salt and pepper into a large bowl. **Whisk** to combine creating a well in the centre.
3. **Place the butter**, milk and eggs into the well of the flour and whisk until just combined.
4. **Gently fold** through the zucchini, carrot, corn and cheese. If your batter looks a little dry (depending on the brand – wholemeal flours can vary slightly and require a tad more liquid) simply add a splash of milk.
5. **Evenly divide** the mixture in the prepared muffin tray.
6. **Bake for 15-18 minutes** or until golden and when a skewer inserted removes cleanly.

Allow the muffins to cool for 5-10 minutes before placing on a wire rack to cool completely. **Enjoy x**

Book reviews

Fresh stories for the food lovers!

ONE LITTLE DUNG BEETLE | RHIAN WILLIAMS

One Little Dung is a playful, rhyming counting book that invites children into the tiny, fascinating world of beetles. As we follow **one hardworking dung beetle** and meet a whole host of other beetles. Children explore numbers, rhythm and rich new vocabulary. Detailed, jewel-like illustrations reward close looking, with little visual surprises to spot on each page. Shortlisted for the 2025 CBCA Book of the Year (Early Childhood), this is a joyful way to spark curiosity about mini beasts, caring for our environment and noticing the wonders right outside our doors.

SOUTH WITH THE SEABIRDS | JESS MCGEACHIN

South with the Seabirds tells the remarkable true story of four female scientists who in 1959 undertook a daring expedition to the remote Macquarie Island in the sub-Antarctic. Their journey, aboard an ice-breaking ship, led them to giant seabirds, penguins, seals and a wild, windswept island teeming with life. Through vivid watercolour illustrations and carefully researched storytelling, the book brings alive their discoveries and the wonders of a fragile ecosystem. It is a stirring tribute to scientific curiosity, gender equality in STEM and environmental conservation, perfect to inspire young readers and families.

THE WOBBLY BIKE | DARREN MCCALLUM

The Wobbly Bike is a warm, gently humorous picture book about learning to ride a bike, even when it feels wobbly and out of control. Set in Darwin and rich with snapshots of life in Australia's "top end," the story celebrates the love and encouragement of grandparents, the importance of patience and practise, and the joy of mastering something for the first time. The lilting rhyme and lively illustrations make the mishaps and perseverance feel real and familiar. A wonderful read-aloud for preschoolers and families that gently encourages resilience and kindness.

FOCUS: Understanding Quality and Safety in Early Childhood Services: What Families Should Know

When families choose an early childhood service, one of the first questions—spoken or unspoken—is always the same: “Will my child be safe, supported and cared for here?” It’s a big decision to entrust your baby, toddler or preschooler to someone else’s care, and it’s natural to want confidence that the environment your child enters each day is warm, predictable and protective.

Across Australia, all early childhood education and care services operate under the National Quality Framework (NQF). The NQF is the national system for regulating and improving the quality of early education and care. It is made up of several key, stable components including- the National Law and National Regulations which are the legal requirements all services must meet including staffing, health and safety, educational programs, physical environment and operational procedures. The NQF also includes the National Quality Standard (NQS) which defines what high-quality education and care looks like and feels like. This means that every service, regardless of type or location, follows a nationally consistent approach to quality. Recent legislative changes, have strengthened the National Law by making the safety, rights and best interests of children the paramount consideration for daily practices, policies and procedures in education and care services.

A Safe, Calm and Predictable Environment

Creating a child-safe environment involves more than child-proof locks or soft flooring. Guided by the NQF, services design spaces where children feel physically secure and emotionally supported. This includes thoughtful room layouts, active supervision, predictable routines and warm, trusting relationships. Educators conduct regular safety checks, maintain equipment and ensure children can move freely and comfortably. You may notice furniture changes or outdoor updates such as improved shade, fencing or soft-fall surfaces—visible signs of the ongoing safety checks and continuous improvement processes required under the NQF.

Safe Sleep and Rest Practices

For babies and toddlers, safe sleep is essential. Services follow recognised safe-sleep guidelines and monitor children closely throughout rest times. The NQF requires educators to stay up to date with training and current recommendations so families can feel confident that sleep routines are carried out safely, consistently and with children’s safety, health and wellbeing at the centre of all decisions and practices.

Hygiene and Everyday Health Practices

Good hygiene is a cornerstone of quality care. Under the NQF, services must maintain high standards of cleanliness and infection control. This may include daily cleaning schedules, sanitising frequently used equipment, wearing gloves for nappy changes, practising correct handwashing and following safe food-handling procedures. You may also see improvements that reflect current health guidance, such as enhanced ventilation or updated illness policies. While the specifics vary between services, the aim remains the same: to maintain a healthy environment for all children.

Responding to Emerging Issues

As the world changes, so do the risks children may encounter. The NQF requires services to regularly review and update their policies to stay informed, prepared and responsive. Our policies support safe and consistent practice in areas such as:

- Digital safety and the responsible use of technology
- Smoke-free and vape-free environments
- Sun safety and monitoring UV levels
- Safe collection procedures and clear communication with families
- Allergy and asthma management with the need for current medical management plans for children with medical conditions
- Emergency preparedness, including evacuation and lockdown procedures

These policies provide clear guidance for educators and ensure we respond to safety matters calmly and confidently. All policies are available for families to view at any time they are displayed within the service, and copies can be requested whenever needed.

Child Protection and Wellbeing

Child protection is a major focus of the NQF. All persons working in education and care must have a valid Working With Children Check or Vulnerable Persons Check. Educators and staff understand child protection law and comprehend their mandatory reporting obligations and responsibilities in recognising concerns, responding appropriately and reporting to relevant authorities. From February 2026, all staff and educators will need to complete mandatory national child safety and protection training.

Equally important are the everyday interactions that help children feel emotionally secure—warm greetings, comfort when they’re upset, listening to their ideas and supporting them to manage emotions. Safety is not only physical; it also includes feeling valued, respected and understood.

Partnerships With Families

The NQF emphasises the importance of strong partnerships with families. Quality and safety are strengthened when educators and families work together, share information and communicate openly. This may happen through daily conversations, family events, online platforms or policy updates.

If you have questions about any aspect of child safety or practice, our team welcomes the opportunity to talk with you. Transparent communication helps us support children in the best possible way.

Continued on the following page...

What This Means for You

For families, the NQF provides a consistent and reliable foundation for quality care. It means:

- Your child's service is monitored and assessed against the National Quality Standard and their quality rating must be clearly on display
- Children's safety, rights and best interests inform every decision, from room set-up to daily routines and interactions to financial decisions in the service
- Educators participate in ongoing professional learning
- Policies are reviewed and updated regularly to reflect mandatory law and regulations and current best practice
- Families can access, read and provide suggestions and feedback to policies at any time.

Most of all, it means your child spends their day in an environment purpose-built to support safety, wellbeing, learning and belonging.

Early childhood is a precious time, and families deserve to feel confident in the care their children receive. With the NQF guiding best practice and with policies kept open and accessible to families, services can provide warm, secure and nurturing experiences that help children thrive now and well into the future.

LET'S PLAY HOPSCOTCH

Hopscotch is a simple, classic outdoor game that builds both physical skills and early maths understanding. Draw a hopscotch grid with chalk and number each square. As children hop along, encourage them to call out the numbers they land on. For extra excitement, children can toss a small stone or beanbag onto a square and collect it as they move through the course.

This playful activity helps children practise counting in sequence, recognise numerals and notice which numbers come before or after others. Seeing the numbers arranged on the ground also strengthens their sense of number relationships—such as understanding that seven is closer to nine than to one. It's an easy way to combine movement, learning and fun.

LUNCHBOX LOW WASTE – SIMPLE SWAPS FOR EVERYDAY MEALS

Creating a low-waste lunchbox doesn't have to be complicated. Small, consistent changes can significantly reduce single-use plastics while also saving families money over time. One of the easiest places to start is by replacing disposable items, cling wrap, sandwich bags and single-serve packets—with long-lasting alternatives.

Reusable containers in a mix of sizes make packing lunches simple and keep food fresher for longer. Beeswax wraps or silicone covers are great for sandwiches, muffins and cut fruit, offering a washable, eco-friendly option.

Buying snacks in bulk is another simple swap that reduces waste. Instead of single-serve yoghurt pouches, chips or crackers, consider filling small containers from larger tubs or packets. This approach cuts down on unnecessary packaging and gives you greater control over portion sizes and ingredients. Families can also plan ahead by prepping lunches the night before, which reduces the temptation to rely on grab-and-go packaged foods.

Adding low-waste items such as whole fruit, homemade muffins, veggie sticks or leftovers helps create a nutritious lunch while keeping waste to a minimum. Over time, children learn the value of caring for the environment through everyday habits. A low-waste lunchbox is not about perfection, it's about simple, sustainable choices that make a big difference.

WATER COLOUR PAINTING

Watercolour painting is a gentle, expressive art activity that invites children to slow down, observe and explore. Watercolours behave differently from other paints, encouraging children to experiment and discover what happens when colours blend, dilute or layer. The soft edges and flowing textures make every attempt feel successful, even for beginners.

You will need:

Water colour palette

(Find Micador pallets at Big W)

Water colour paper (Kmart is really affordable)

Set up a simple painting space and offer prompts to spark curiosity. You might place leaves, flowers, pinecones or favourite household objects nearby for children to observe and paint. Alternatively, let their imagination lead, many children enjoy making rainbows, landscapes, or abstract patterns as they notice how the colours move across the page. Older children may enjoy trying wet-on-wet techniques, salt textures or adding details once the paint has dried.

Watercolour painting supports fine-motor development, hand-eye coordination and early artistic confidence. It also creates a moment of mindfulness, helping children unwind while focusing on gentle brush movements and colour changes.

This activity is easy to set up and pack up, soothing to engage in, and offers a beautiful opportunity for families to slow the pace and create something together.

Changes to the Activity Test from January 2026

From 5 January 2026, all Child Care Subsidy (CCS) eligible families can get at least 72 hours of subsidised care per fortnight. These changes are known as the 3 Day Guarantee.

Families can get 100 hours of subsidised child care each fortnight for each child if they:

- care for an Aboriginal and/or Torres Strait Islander child.
- have more than 48 hours each fortnight of recognised participation
- have an exemption or experience exceptional circumstances, or
- receive Additional Child Care Subsidy (ACCS) child wellbeing, temporary financial hardship, or grandparent payments.

Families must still pay a gap fee, except in certain circumstances.

Families who want to get more than 72 hours will need to report their recognised participation to Services Australia.

KEEPY UPPY

Short simple activities to get some active minutes in the day.

This quick, high-energy game works for one child or the whole family. All you need is a single balloon. **The goal is simple:** keep the balloon in the air for as long as possible without letting it touch the ground.

Add fun variations to suit different ages: use only elbows, only knees, or one hand behind your back. Older children can try gentle taps or set a family record for longest time in the air. Try putting the sprinkler on for a really 'cool' challenge.

This game builds coordination, balance and teamwork, and always ends in laughter. Perfect for indoors, outdoors or days when you need a fast movement break.
